Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 14/07/2006

Summary

Main Features

DESCRIPTION

The Australian Standard Geographical Classification (ASGC) is a hierarchical classification system of geographical areas and consists of a number of interrelated structures. It provides a common framework of statistical geography and enables the production of statistics which are comparable.

The ASGC 2006 has a date of effect of 1 July 2006.

The product **1216.0.15.001 ASGC 2006 Electronic Structures** contains four comma delimited files showing the levels and hierarchy of those ASGC structures current for the edition: the Local Government Area Structure, the Main Structure, the Statistical District Structure and the Statistical Region Structure. The Urban Centres/Localities by State/Territory ASGC 2006 file will not be available until September 2007.

Any inquiries regarding the Classification can be made by contacting the Assistant Director, Geographical Classification, on telephone (02) 6252 5888, facsimile (02) 6252 8666, email geography@abs.gov.au or by writing to Locked Bag 10, Belconnen, ACT 2616.

About this Release

The Electronic Structures contains four comma delimited files showing the levels and hierarchy of the ASGC Local Government Area Structure, Main Structure, Statistical District Structure and Statistical Region Structure.
